

What do I do?

I think I may have **COVID-19**

EVALUATE YOUR SYMPTOMS. Many of the symptoms mimic the flu:

- Dry cough
- Sneezing
- Heavy feeling in chest
- Fever
- Difficulty breathing
- Some COVID-19 survivors have said that they lost their sense of taste or smell but this has not been proven in scientific studies.

IF YOU HAVE THESE SYMPTOMS, CALL YOUR PHYSICIAN.

DO NOT go to the hospital unless you are having difficulty breathing.

DO NOT go to your physician's office without calling first.

YOUR PHYSICIAN WILL EVALUATE YOUR SYMPTOMS. You may be tested for the flu or other medical conditions. **If it is determined that you should be tested for COVID-19, your physician will fill out the necessary paperwork. Hospitals which have drive-through testing sites will not administer the test without the necessary paperwork.**

Most sites require a call with a health care representative to set up an appointment. There will also be specific rules to follow depending on which drive-through site you plan to use.

**If your test result comes back positive,
you should be prepared to self-quarantine for 14 days.**
